Product Details

The EvacuLife Transit Chair is simple, effective and lightweight for use in external sporting, festival, aged care, ambulance and pre-hospital environments. These chairs are designed to assist in moving patients from wherever they are found. They fold to a compact size for convenient handling and storage.

The chairs have been developed taking into consideration designs which assist with comfort and ease of use for both patient and attendant. The chairs offer support for the patient's shoulders and feet while providing comfortable foot and head-end hand grips to enhance comfort and stability for the attendant. The Transit Chair is supplied standard with chest and ankle plastic buckle chest restraints.
