Evacuation Chair Accessories

We also have a full range of
**Evacuation Chair Signage &
Anti-Theft Alarm**

For those who desire transportation at the push of a button, the EvacuLife Power is the perfect solution. No more struggling with lifting or carrying, which can be uncomfortable for both patients as well as operators. The EvacuLife Power puts the emphasis on safety and stability going up and down stairs using a sophisticated electronic motor control device and a direct drive transmission.

The smooth transportation up and down stairs and the intuitive, push button controls mean that evacuees stay safe and comfortable and operators don't have to worry about straining themselves carrying a patient load.

Features

- Extra wide track system for safer and easier transportation during evacuation
- Two rear lift handles
- Rear castor with brakes
- One inch track-to-ground clearance provides smooth rolling over carpet and rough surfaces
- Smooth 75mm front swivel wheels and extra tall 125mm rear wheels do not collect debris and provide manoeuvrability in confined spaces such as stair landings
- Motor controls work in any handle position
- All metal aluminium alloy frame construction provides durability and long life
- Large patient seating surface panel
- Extending foot-rest
- Maximum safety when going up and down stairs using an electronically controlled motor and direct drive transmission with chair tracks
- Maximum performance on every call with intelligent power system that can carry up to 250kg.
- Easy operation when climbing or descending stairs with intuitive, easy-to-use push button controls
- Includes a rechargeable lithium-ion battery that is easy to remove (1 year warranty).
