

EvacuLife

Elite Evacuation Chair

For Evacuation upstairs and downstairs

The EvacuLife Elite is our industry-leading premium evacuation chair that can be used by a single operator thanks to a special tracked system that makes it light, safe and easy to move and use.

The evacuation chair has been designed for use in multi-story buildings to transport individuals that are unable to evacuate via stairs independently. It consists of four wheels for easy ground movement, the rear wheels include easy to access brakes. The evacuation chair fully supports evacuees safety during the transport process due to its uniquely designed 4 point harness system that can also benefit people with reduced trunk control and low torso muscle tone. A footrest that includes a restraint strap to manage leg spasms during an evacuation is also included.

Chair Open

Weight	15KG	Height	160CM
Maximum Load	160KG	Rear Wheels	14CM dia
Width	49CM	Front Wheels	7CM dia

Elite Evacuation Chair

Elite Evacuation Chair Accessories

We also have a full range of
**Evacuation Chair Signage
& Anti-Theft Alarm**

It is made from aluminium alloy and its key characteristics are being lightweight, small-sized, easy to carry, user-safe, whilst being easy to sterilise and clean.

The EvacuLife Elite is the total solution for any emergency evacuation situation and comes with a 5 year warranty.

- The chair has a 4 point harness system that assists in supporting people with low upper body control.
- The main rear wheels have a diameter of 140mm in order to improve stability, comfort, and movement.
- The rear wheels have a brake system that blocks forward and reversing movement and rotation even on steep slopes.
- The chair has a headrest with a head-strap to support a person's head and neck if required.
- Both headrest and seat are detachable, made out of vinyl material coating 600D, antibacterial in order to improve comfort, hygiene, and durability.
- Integrated instruction provided on the headrest.
- Additional foldable rear handles
- Lockable rear wheels
- Use with our Evacuation Chair Signage & Anti-Theft Alarm
- Footrest and restraints for comfort during use and to address leg spasms.
- Lightweight alloy aluminium frame
- Friction controlled custom made high resistance belts in canvas reinforced with rubber.
- Meets DDA and Health and Safety Responsibilities
- 5 Year warranty
